

SPOOKY SCIENCE EXTRAVAGANZA

PRESENTED
BY
girlstart

Table of Contents

Materials List	Page 4
Blood Components Create a model of human blood using candy components.	Page 6
Egg Drop Challenge Test Newton's First Law of Motion in an experiment with a raw egg.	Page 9
Screaming Cup Make a cup "scream" by adding string, water and a little friction.	Page 11
Creepy Constellations Create your own Halloween-themed constellation and write a creepy tale about it!	Page 13
Spinning Spiders Build your own spider and spider web while learning all about their unique properties.	Page 20
Slime Make your own batch of slime while exploring the science of polymers.	Page 24
Spooky Skeleton Create a spooky skeleton from cotton swabs and learn about the skeletal system.	Page 26

Red Handed

Page 31

Write a secret message or make a “bloody” handprint on goldenrod paper, a pH indicator.

Conductors and Insulators

Page 33

Explore the differences between conductors and insulators by testing different materials in a closed circuit.
